

# Making life EZI... for Plumbers

Ezi Pex Crimp™ system was developed to satisfy the requirements of customers who were seeking an alternative to the existing Ezi Pex Slide™ compression system.

One of the key requirements was the need for a quick and effective jointing method combined with the peace of mind provided by the performance benefits of pex pipe. It was also clear that customers had a definite preference to continue using our existing and already proven Ezi Pex™ pipe

Currently available in sizes 16-32mm... and complete with a 25 year warranty its makes life EZI... for plumbers!

All installations should be carried out by an appropriately licensed tradesperson and in full accordance with the Ezi Pex Crimp™ installation guidelines, the relevant Australian standards and any additional local authority requirements.
