

Making life EZI... for Plumbers

Ezi Press™ system provides a complete press fit system for copper tube with specific fitting ranges for Gas, Water and Solar applications. No more brazing, soldering or flaring required. All joints are simply assembled with a pressing tool for a quick, neat and secure result first time, every time.

Currently available from DN15 to DN100... and complete with a 25 year warranty, it makes life EZI... for plumbers!

All installations should be carried out by an appropriately licensed tradesperson and in full accordance with the Ezi Press™ installation guidelines, the relevant Australian standards and any additional local authority requirements.

Ezi Press™ Solar fittings are manufactured in high quality copper and/or DZR brass material with a factory-fitted high performance red (FKM) sealing element.

Ezi Press™ Water fittings are manufactured in high quality copper and/or DZR brass material with a factory-fitted high performance black (EPDM) sealing element.

Ezi Press™ Gas fittings are manufactured from high quality copper and/or DZR brass material with a factory-fitted high performance yellow (HNBR) sealing element.
